aesle srl - CONCERTIA
SABRINA

CONCERTIA **giada** spa

HISTORY

Callisto Dal Maso was born in 1912 in the hills of Arzignano. He can certainly be considered one of the leaders of the industrial development process in the land of Chiampo and in 1987, as appropriate recognition for his lifetime hard work, he received the award title of Order of Merit for Labour. Thanks to his firm ideas and his own entrepreneurial intuition, combined with great tenacity and sacrifices, in the years following the end of the WWII he achieved a series of successes that led to the creation of "Sabrina Tannery" in 1972.

The history of Conceria SABRINA took a turn with the launch of the first article for Shoe Upper: the KIPS, which granted the company the commercial strength to expand into international markets. With more than four decades of experience and with a strict and never-ending attention to guarantee the highest Made in Italy quality, Conceria SABRINA is now a globally recognized company that boasts important collaborations, both on the domestic market and abroad. After the successful experience of Conceria SABRINA, in 1977 Callisto Dal Maso founded Conceria GIADA, a tannery company specialized in furnishing and clothing production. In 1991, following to huge market demand, his son Felice founded Conceria PALLADIO. For more than twenty years, Palladio has faced development and changes of the world markets with increasingly effective and dynamic solutions, becoming today an undisputed leader in its field. In 2011, A.ESSE Srl was founded, a company entitled to sell the products of ALL THE GROUP.

TODAY

The company is still a Family run business, with Callisto's Son and Granddaughters, who are Owners and Managers of the Company.

PRODUCTION

Every leather is selected and processed with the care and the experience that qualified personnel have handed down through GENERATIONS, with a certified PRODUCTIVE SYSTEM that further guarantees a stable top-level quality. Articles and types of leather products are numerous, and colors endless. We are always attentive to the latest fashion thanks to the creative collaboration of famous fashion designers. A stocked warehouse also allows to meet the demands of customers worldwide in a very short time.

OUR KEYWORDS

COLLABORATION: Our main objective is to create collaboration with our customers to give technical advice and support.

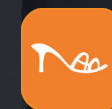

RESEARCH & DEVELOPMENT: Thanks to the competent and untiring teams, today the company offers a vast range of products.

GLOBAL PRESENCE: We are present all over the world with a very reliable sales network, offices, warehouses, and trading companies.

INNOVATION: We are always improving our production process with new technology and state of art machinery.

FIELDS OF USE

SHOES: the core business of our production is leather for shoes. Ladies, men and children shoes companies know that with our leather they can be sure of the result. Our characteristic is the very high quality of production that is made in collaboration with stylists and famous brands of all around the world. The different finishings based on anilins, oils, and waxes give to the leather a great value that is perceivable in the finished shoe.

LEATHER GOODS: leather for handbags has to be original and characteristic. For this purpose, we create leather that is always unique and personalized together with the customer. We produce stiff leather for little pochettes, but also very soft skins for big bags for day and night occasions. Based on the customer needs, we can create whatever product from 0.3mm of thickness leaving the tear strength unchanged.

GARMENT: our collection of leathers for garment include a wide range of products: from very high quality nubuk made of calf skins to the classical bovine articles. Our secret is the unique working process that for more than 40 years has been specialized.

FURNITURE: leather for furniture has to be a big skin suitable for covering a sofa without any tiresome seam. We produce resistant, though elastic, leather, appropriate to cover different pieces of furniture. Minimum surface of the skins is 4 sqmt, which make them perfect to cover leather sofas, armchairs, pouffs, as they are very easy to cut for the upholsterer.

AUTOMOTIVE AFTERMARKET: we supply the automotive aftermarket by producing leathers that accomplish specific requirements and technical needs, and by selling to a lot of wholesalers and warehouses around the world.

CONTRACT: we are used to developing projects together with architects and designers, in order to specify the most suitable product at the best costs and results ratio.

SPECIAL USES: since long time Sabrina has been working with important customers in different countries to supply leather with specific technical characteristics. Leather for the Army, the Firefighters, the Air Force and Motorcycling has been specialised with unique tanning and finishing processes that can guarantee the respect of the strictest laws and requirements of the different nations.
